## **A Glimpse of Gujarat through World Wide Web**

**Dr. Rajeshkumar M. Gamit**

**Assistant Professor**

**Department of Library and Information Science  
Gujarat University, Ahmedabad-380009, India**

**Abstract** - This article is very important and useful for all types of users, researches and society in higher educational institution, ICSSR, ISRO, Medical, Science and Technology, Food, Finance, Industries, Panchayat, Rural and Urban development, Forest, Revenue, Air, Road and Building, Women and Child development, Social justice, Home, Tribal, Narmad development and Port and Transport regarding information development. The WWW data which is presented in this paper is useful to save time and efforts of Researchers, Academicians, Scientists and Regulatory authorities for making their work easy and achieving their goals. This research article survey on above total number of 310 department websites data, information that provides information knowledge, growth and development in information searing services by user. World Wide Web through internet provides information to society, educational, research and business sector like information glimpse of space, stars, galaxies and other visionary ideas because of this magical gift nowadays, everyone is relied on Internet for all the routine activities including scientists, academicians, students, medical parishioners, Government authorities, Semi Government authorities, Private Authorities, Job seekers and other business persons.

**Keywords** - Glimpse, WWW, Internet, IT, Knowledge, Government, Gujarat

### **I. Introduction**

In the 21<sup>st</sup> century-the age of information and technology, www have played a very crucial role in the field of research and business development sector and all other fields. Really, we are so lucky that the revolution took place in information technology in the beginning of the present century. Among various information tools, internet is a miracle and boon in our routine life. Internet is a worldwide network of millions of computers providing information of texts, pictures, videos and all other things. Internet has converted whole the wide world in a handful identity. Moreover, we can have glimpse of space, stars, galaxies and other visionary ideas through this magical gift.

Internet was been developed jointly by American computer engineer Vinton Cerf and Robert Kahn in 1973, while World Wide Web (WWW) system was been invented in 1989 by Timothy Berners-Lee, computer scientist of United Kingdom.

According to the statistical information of census 2011, in India there are 25 core (246.7 million) internet users new. But it is believed that within next five years this ratio will be reach to 60 cores. Now in Gujarat, there is about 3.1 core internet users but in next five years it will be increase to 4.3 core as it is believed.

Our survey indicates that about 62 million people are using internet in India and Gujarat in 2014 respectively. Basically, Internet becomes a part and parcel of our life and, certainly, it is difficult to survive without this facility as it provides mental dosage to the educated population. Nowadays, everyone is relied on Internet for all the routine activities including scientists, academicians, students, medical parishioners, Government authorities, Semi Government authorities, Private Authorities, Job seekers and other business persons.

My experience and observation dictate me that people, normally, waste several hours to search the home page of their interest resulting into decrease in yield and productivity. In present scenario everyone is in the paucity to time. In view to this, we realized that there must be a worldwide web data base for the community to save their time and reach quickly at their destination. We have compiled the web sites of all most all Gujarat Organizations, Institutes, Central Universities, IITs, Ministries, Funding Agencies, Libraries and other general offices along with some important International publishers and organizations.

## **II. Overview of Gujarat**

Gujarat state in the western part of India, It was established on 1 May, 1960 and has 33 Districts. It is known locally as Jewel of the West. It has an area of 196,204 sq. km (75,755 sq mi) with a coastline of 1,600 km (990 mi), most of which lays on the Kathiawar peninsula and has a population in excess of 60 million. The population of Gujarat state was 60,439,662 according to the 2011 Census data. The state is bordered by Rajasthan to the north, Maharashtra and the Union Territories of Diu, Daman, Dadra and Nagar Haveli to the south, Madhya Pradesh to the east, and the Arabian Sea as well as the Pakistani province of Sindh on the west. Its capital city is Gandhinagar, which is the largest state of Gujarat is home to the Gujarat-speaking people of India.

Gujarat, total geographical area is 19,602,400 hectares, of which crops take up 10,630,700 hectares. The three main sources of growth in Gujarat's agriculture are from cotton production, the rapid growth of high-value foods such as livestock, fruits and vegetables, and from wheat production, which has an annual average growth rate of 28% between 2000 and 2008 (According to the International Food Policy Research Institute). Gujarat has seen a high average annual growth of 9% in the agricultural sector, the rest of India has an annual growth rate of around 3%. This success was lauded by Former President of India, Dr. APJ Abdul Kalam.

### **Need of the Glimpse of Gujarat through World Wide Web Study:**

As already mentioned, the major aim of this study is to determine the information requirements of the users and researchers to understand their pattern of using the World Wide Web for information. The main objective of choosing this topic is that the users and researcher in Gujarat feels that conducting this present study would be highly beneficial for improving the

internet services with the society. This conducted study is the starting point for the users and researcher to develop such searching skills and knowledge. Further such research works helps to reveal the pitfalls and the benefits of the internet services offered by the all types of institutions, government and non government sectors which will be very helpful for the knowledge management. Having all this in mind the society, users, people and researcher has selected this topic which provides useful information.

### III. Objectives of the Study

1. To know of all types of users and researchers using website information.
2. To find out from society regarding information growth.

### IV. Methodology

This research article is base on observation method using Website ID regarding information of all types of users and researchers, general peoples which use website for searching information. Websites are used in various types of institution, academic, research, society and various people by used website for seeking useful information.

#### World Wide Web's to Glimpse of Gujarat:

Research topic regarding various types of information has following:
